

**Analysing HIV-Related Risk Factors among Pre-Exposure Prophylaxis (PrEP)
Program Beneficiaries in Georgia, 2022–2024**

Lasha Nonikashvili

*Master's Thesis is submitted to Ilia State University Faculty of Natural Sciences and
Medicine; MPH program Public Health and Health Policy*

Project Supervisor: Davit Otiashvili, Associate Professor

Ilia State University

Tbilisi, 2025

Acknowledgement

I would like to thank my academic supervisor, Assoc. Prof. Davit Otiashvili, for his extraordinary insight, guidance, unwavering support and invaluable assistance throughout every stage of this research project. His mentorship profoundly shaped the scholarly depth and practical components of this thesis.

I gratefully acknowledge the contribution of Dr. Maia Tsintsadze (MD, PhD), my internship supervisor at T. Tsertsvadze's Infectious Diseases, AIDS and Clinical Immunology Research Center. Dr. Tsintsadze's professional guidance, support, and unparalleled assistance in securing critical programmatic data were fundamental to my study's success. Her insights on HIV prevention and public health practice were essential to my learning and practical experiences.
