1. Table of Contents

Contents

1.	Table of Contents.....	i
2.	List of Abbreviations	ii
3.	Introduction	1
4.	Literature Review	3
4.1.	Theoretical, Ethical, and Clinical Foundations of the DNR Concept.....	3
4.1.1.	The Essence, Purpose, and History of the DNR (Do Not Resuscitate) Decision.....	3
4.1.2.	The Medical Effectiveness of Cardiopulmonary Resuscitation (CPR) and Its Limits of Application.....	6
4.1.3.	Ethical Principles of Protecting Patient Autonomy, Informed Consent, and Dignity in DNR Decisions	9
4.1.4.	The Place of DNR in Palliative Care and End-of-Life Management	13
4.2.	Legal Regulation of DNR, International Experience, and Public Perception.....	16
4.2.1.	International Models of Legal and Institutional Regulation of DNR	16
4.2.2.	The Role of Doctors, Patients, and Family Members in the DNR Decision-Making Process	20
4.2.3.	Public Knowledge, Attitudes, and Factors Influencing Decisions Regarding DNRs	23
4.2.4.	Challenges and Prospects for the Practical Implementation of DNR in Georgia.....	27
5.	Methodology	30
5.1.	Study Aim, Research questions and Hypothesis	30
5.2.	Study design	32
5.3.	Sampling and Recruitment	32
5.4.	Sample Size	33
5.5.	Survey instrument	34
5.6.	Ethical Considerations.....	35
5.7.	Data Analysis.....	35
5.8.	Theoretical Framework of the Study	36
6.	Results section	37
6.1.	Demographic and Professional characteristics of the respondents.....	37
6.2.	Awareness of DNR and professional experience	42
6.3.	Assessment of DNR knowledge	44
6.4.	Comparison of Professional groups by DNR knowledge	46
6.5.	Parties involved in DNR decision-making.....	48
6.6.	Attitudes toward DNR.....	49

6.7.	Practical barriers and training needs	50
6.8.	Summary of the key findings.....	51
7.	Discussion	52
8.	Conclusions and recommendations	56
8.1.	Conclusion.....	56
8.2.	Recommendations.....	58
9.	References	60

2. List of Abbreviations

APA — American Psychological Association

CPR — Cardiopulmonary Resuscitation

DNR — Do Not Resuscitate

DNACPR — Do Not Attempt Cardiopulmonary Resuscitation

POLST — Physician Orders for Life-Sustaining Treatment

WHO — World Health Organization

R — Statistical software used for data analysis

χ^2 — Chi-square test

p-value — Probability value used to determine statistical significance
