Equation 1 is wrong. It should read:

$$C_{\text{int}} = \text{RNE} = (P_{\text{T+N}} - P_{\text{T-N}}) / x$$

The equation in Fig. 2 (and also Eq. 10 in Table 3) contains a wrong number. 1.87 should be replaced with 19.64, and the correct equation should thus read:

$$\log[(1 - Y)/Y] = 19.64 - 14.63x$$
