Annotation

The Master research work « The contemporary Italian slangs » or gergo, concerns youth language, the problem of studying stylistic and communication functions of lexical units of gergo, in modern Italian language. Slang is an object of studying of such philological and social sciences, as stylistics, sociology and socio-linguistics, which is linguistic and on the other hand social phenomena. It is a social dialect.

This work deals with slang of Italian youngsters in lingo-cultural area. The examined lexical units were divided into two groups. The most efficient ways semantic and formal, for creating Italian slang were underlined. The semantic way envisages borrowing, metaphors, metonymies, while formal-truncation and hypocoristic doubling.

Gergo, which is called the language of youngsters is subject of thorough studies in Italy. Their study can be continued according to different regions as it is everlasting theme. Everyone, who goes on with this research finds it enchanting.
